

## Important information for your purchase

### **Fridge:**

No freezer or various temperature zone regulations.

### **Lamp:**

Dimmable if possible. Otherwise for very small plants up to 20cm max. 30W and then a maximum of 150W.

### **Heater:**

Pay attention to performance and size. Less than 500W are ideal. If you have a stronger heater, you must adjust the heating interval in the settings.

### **USB fan:**

Here you are very free to choose and we recommend at least 3 fans that are arranged so that the air can circulate.
